Faces of Science: Juan Duque

March 4, 2015

Duque bent on discovery with sensors and new materials

For as long as he can remember, Juan Duque has been fascinated with building new things and learning how they work.

Faces of Science: Juan Duque

Juan is developing tools that enable researchers to design new materials for photovoltaics and sensors.

As always, it is scientific research that drives Juan, as his work often takes him in unexpected directions that always keep the discovery process dynamic and exciting.
